Environmental Policy

Nanosonics Limited

ABN 11 095 076 896

1 PURPOSE OF THIS POLICY

Nanosonics is an Australian-based global infection prevention company, leading the way with innovative solutions on preventing the transmission of life-altering infections.

Nanosonics' mission is to improve the safety of patients, clinics, their staff and the environment by transforming the way infection prevention practices are understood and conducted and by introducing innovative technologies that deliver improved standards of care. This mission is reflective of Nanosonics' commitment to environmental stewardship outlined in this Policy.

2 SCOPE

This Policy applies to the Company globally for all operations, facilities and activities.

3 COMMITMENT

3.1 Reducing our impact on the environment

Nanosonics recognises the value of minimising its impact on the environment throughout all stages of the life cycle of its products, and recognises the value of taking steps to improve the long term environmental and social sustainability of the wider Nanosonics business.

Nanosonics will continue to manage its environmental performance by taking reasonable steps to:

- Review Nanosonics' environmental performance against our disclosed targets that seek to identify and manage the Company's environmental impacts, and make associated public disclosures including in the Company's Annual Report and Sustainability Reports.
- Aim to ensure that the Company's products are environmentally safe when in use, and utilise recyclable components where feasible.
- Review its waste management practices and where possible reduce the amount of residual waste produced.
- Endeavour to optimise our use of resources including water, energy and other fuels efficiently.

3.2 Climate Change

Nanosonics recognises that climate change is a global problem, leading to an ever growing responsibility to address climate change. Nanosonics has committed to identifying transition risks stemming from the regulatory, supply chain, and transportation aspects of our business, which may impact the Company's operations in the future.

Nanosonics is adopting a responsible approach to climate change including:

- Endeavouring to optimise energy efficiency with a view to reducing our greenhouse gas emissions.
- Maintaining a watching brief on government policies and scientific reports which may indicate emerging climate change risks or opportunities for Nanosonics.

- Ensuring that appropriate actions are taken and the Executive and the Board are kept apprised as appropriate.

3.3 Sustainability

Nanosonics recognises its long-term sustainability is predicated on its environmental, social and economic performance. To this end Nanosonics will:

- Identify its most important impacts on the environment, society and the economy considering the perspectives of the company and our stakeholders including our suppliers.
- Develop responses which are aligned with our business goals and integrate them into business planning and operations.
- Make public disclosures on actions and progress in meeting our goals for addressing environmental, social and economic impacts and the associated risks.

This Policy embodies Nanosonics' commitment to contribute to the conservation and preservation of the global environment and must be read in conjunction with the laws relating to the environment, sustainability and the responsibilities (if any) in the many local environments in which Nanosonics operates.

4 COMPLIANCE

A copy of this Policy is made available to all Nanosonics staff and is also available on Nanosonics' external website. The Policy will be periodically reviewed.

Any proposed changes to the Policy will be reviewed and approved by the Board.
